✅ All systems normal

No unusual power spikes detected.

💡 Optimization Tips

❄️ Set AC to 24°C instead of 22°C
~15% on cooling costs

💡 Use LED lights instead of CFL/incandescent
~75% on lighting costs

🔌 Switch off devices during non-occupancy hours
~20% on standby power

⏰ Use timer-based scheduling for water heaters
~30% on heating costs

📊 Shift heavy-load appliances to off-peak hours (10 PM - 6 AM)
